Special Volume dedicated to
the Memory of Dr. Dale McFarlin

CONTENTS

Editorial 1

Research Papers

Staphylococcal enterotoxin enhances the activation of rat encephalitogenic T cells by myelin basic protein
D. Sun (USA) 5

Lymphocytic choriomeningitis virus induces a chronic wasting disease in mice lacking class I major histocompatibility complex glycoproteins
P.C. Doherty, S. Hou and P.J. Southern (USA) 11

Induction of nitric oxide synthase activity in human astrocytes by interleukin-1β and interferon-γ
S.C. Lee, D.W. Dickson, W. Liu and C.F. Brosnan (USA) 19

Trafficking of activated cytotoxic T lymphocytes into the central nervous system: Use of a transgenic model
M.B.A. Oldstone and P.J. Southern (USA) 25

Identification of a novel T cell epitope of human proteolipid protein (residues 40–60) recognized by proliferative and cytolytic $CD4^+$ T cells from multiple sclerosis patients
C.M. Pelfrey, J.L. Trotter, L.R. Tranquill and H.F. McFarland (USA) 33

Anti-adhesion molecule therapy in experimental autoimmune encephalomyelitis
B. Cannella, A.H. Cross and C.S. Raine (USA) 43

Presentation of endogenous acetylcholine receptor epitope by an MHC class II-transfected human muscle cell line to a specific $CD4^+$ T cell clone from a myasthenia gravis patient
F. Baggi, M. Nicolle, A. Vincent, H. Matsuo, N. Willcox and J. Newsom-Davis (UK) 57

Minor myelin proteins can be major targets for peripheral blood T cells from both multiple sclerosis patients and healthy subjects
J.M. Van Noort, A. Van Sechel, J. Boon, W.J.A. Boersma, C.H. Polman and C.J. Lucas (The Netherlands) 67

Suppression of experimental autoimmune encephalomyelitis by oral administration of myelin basic protein. VI. Suppression of adoptively transferred disease and differential effects of oral vs. intravenous tolerization
A. Miller, Z.J. Zhang, R.A. Sobel, A. Al-Sabbagh and H.L. Weiner (USA) 73

T lymphocyte lines and clones selected against synthetic myelin basic protein 82–102 peptide from Japanese multiple sclerosis patients
J.-i. Inobe, T. Yamamura, T. Kunishita and T. Tabira (Japan) 83

Immunological analysis of the amino terminal and the C8 isomer of human myelin basic protein
S.-R. Zhou, J.N. Whitaker, D.D. Wood and M.A. Moscarello (USA, Canada) 91

Differential effect of interleukin-1β on Ia expression in astrocytes and microglia
M.E. Smith, D.E. McFarlin and S. Dhib-Jalbut (USA) 97

Gangliosides and bacterial toxins in Guillain-Barré syndrome
H.J. Willison and P.G.E. Kennedy (UK) 105

Homing of T cells to the central nervous system throughout the course of relapsing experimental autoimmune encephalomyelitis in Thy-1 congenic mice
D.S. Skundric, C. Kim, H.Y. Tse and C.S. Raine (USA) 113

Interferon γ- and interleukin-4-secreting cells in multiple sclerosis
C.-Z. Lu, M.A. Jensen and B.G.W. Arnason (USA, China) 123

Adoptive transfer of murine experimental autoimmune encephalomyelitis in SJL.Thy-1 congenic mouse strains
C. Kim and H.Y. Tse (USA) 129

A novel candidate autoantigen in a multiplex family with multiple sclerosis: prevalence of T-lymphocytes specific for an MBP epitope unique to myelination
R.R. Voskuhl, D.E. McFarlin, L.R. Tranquill, G. Deibler, R. Stone, H. Maloni and H.F. McFarland (USA) 137

Interferon β decreases T cell activation and interferon γ production in multiple sclerosis
A. Noronha, A. Toscas and M.A. Jensen (USA) 145

(Contents continued on p. 268)

0165-5728(199307)46:1/2;1-G

(Contents continued from back cover)

Clinical trials of interferons in multiple sclerosis What have we learned?
H.S. Panitch and C.T. Bever, Jr. (USA) 155

Investigation of a synthetic peptide as immunogen for a variant epidermal growth factor receptor associated with gliomas
C.J. Wikstrand, S.D. Stanley, P.A. Humphrey, C.N. Pegram, G.E. Archer, S. Kurpad, M. Shibuya and D.D. Bigner (USA, Japan) 165

Long-term treatment of chronic relapsing experimental allergic encephalomyelitis by transforming growth factor-$\beta 2$
M.K. Racke, S. Sriram, J. Carlino, B. Cannella, C.S. Raine and D.E. McFarlin (USA) 175

Trans-blood-brain-barrier albumin leakage and comparisons of intrathecal IgG synthesis calculations in multiple sclerosis patients
K. Syndulko, W.W. Tourtellotte, A.J. Conrad, G. Izquierdo, Multiple Sclerosis Study Group, Alpha Interferon Study Group and Azathioprine Study Group (USA, Spain) 185

T and B cell responses to myelin basic protein and encephalitogenic epitopes
K.E. Gould and R.H. Swanborg (USA) 193

Magnetic resonance imaging investigation of blood–brain barrier damage in adoptive transfer experimental autoimmune encephalomyelitis
P.A. Seeldrayers, J. Syha, S.P. Morrissey, H. Stodal, K. Vass, S. Jung, T. Gneiting, H. Lassmann, A. Haase, H.-P. Hartung and K.V. Toyka (Germany, Austria) 199

On classification of post-mortem multiple sclerosis plaques for neuroscientists
V. Sanders, A.J. Conrad and W.W. Tourtellotte (USA) 207

Synergistic interaction between measles virus infection and myelin basic protein peptide-specific T cells in the induction of experimental allergic encephalomyelitis in Lewis rats
U.G. Liebert and V. Ter Meulen (Germany) 217

$\gamma\delta$ T cell receptor repertoire in brain lesions of patients with multiple sclerosis
J. Hvas, J.R. Oksenberg, R. Fernando, L. Steinman and C.C.A. Bernard (Australia, USA) 225

The structure of a myelin basic protein-associated idiotope
C.C. Maier, R.D. LeBoeuf, S.-R. Zhou, J.N. Whitaker, M.A. Jarpe and J.E. Blalock (USA) 235

Antibody responses to P_0 and P_2 myelin proteins in Guillain-Barré syndrome and chronic idiopathic demyelinating polyradiculoneuropathy
A. Khalili-Shirazi, P. Atkinson, N. Gregson and R.A.C. Hughes (UK) 245

Binding of an SJL T cell clone specific for myelin basic protein to SJL brain microvessel endothelial cells is inhibited by anti-VLA-4 or its ligand, anti-vascular cell adhesion molecule 1 antibody
M. Tanaka, A. Sato, M. Makino and T. Tabira (Japan) 253
